

About this Documentation

Natural Connection provides an access method required for transferring data, reports, Natural objects and sources from a Natural mainframe computer to a PC.

The prerequisite for the use of Natural Connection is Entire Connection. For information on Entire Connection, refer to the relevant documentation.

This documentation is organized under the following headings:

	Main Functionality	Describes the main functionality that is relevant for the mainframe.
	Installing Natural Connection	Describes how to install Natural Connection on a mainframe.
	Preparing to Use Natural Connection	Describes the tasks that must be accomplished to allow download and upload.
	Natural Statements	Describes the Natural statements that are relevant for processing information between the mainframe and the PC by using Natural Connection.
	Processing Work Files	Describes restrictions on the use of work file attributes, the support of work file formats and the impact of READ loops.
