

CM - Command Mode

This Natural profile parameter can be used to suppress Natural command mode (NEXT and MORE).

Possible settings	ON	NEXT and MORE are available for command input.
	OFF	The Natural session will be terminated whenever NEXT is encountered; the MORE line will be write-protected (no input possible).
Default setting	ON	
Dynamic specification	yes	
Specification within session	no	

Note:

In asynchronous Natural sessions under the TP monitors Com-plete, CICS and UTM, the setting of this parameter is forced to OFF to avoid problems when changing over to NEXT mode.
