

DB2SIZE - Natural Buffer Area for DB2 or SQL/DS

This Natural profile parameter applies to Natural for DB2, Natural for SQL/DS and Natural SQL Gateway.

It sets the maximum size of the buffer area required by these DBMS interface products.

Possible settings	0 - 64	<p>Maximum size of the buffer area in KB.</p> <p>If the requested space is not available, the DBMS interface cannot be used.</p> <p>Set <code>DB2SIZE</code> to 0 if Natural is <i>not</i> to be used for DB2 or SQL/DS.</p> <p>If Natural is to be used for DB2 or SQL/DS, <code>DB2SIZE</code> must be set to at least 40 KB.</p>
Default setting	0
