

LC - Lower to Upper Case Translation

This Natural profile parameter controls lower-case to upper-case translation of input characters.

Note:

This parameter does not apply to Natural stack data which was placed on the Natural stack by the `STACK` statement.

Possible settings	ON	No translation of lower-case characters to upper case is performed.
	OFF	All lower-case characters, except input from the Natural stack which was place there by the <code>STACK</code> statement, is translated to upper case by Natural.
Default setting	OFF	
Dynamic specification	yes	
Specification within session	yes	To disable or enable lower-case to upper-case translation dynamically within the active Natural session, you should use the terminal commands <code>%L</code> or <code>%U</code>
Application Programming Interface	USR1005N	See <i>SYSEXT - Natural Application Programming Interfaces</i> in the <i>Utilities</i> documentation.

Notes:

1. Lower/upper-case translation can also be performed by a TP monitor before control is given to Natural. The corresponding TP-monitor parameters for lower/upper-case translation also have to be reviewed to ensure correct translation.
2. A user-supplied translation table can be used to perform translation from lower case to upper case; see `NTUTAB1` macro (contained in the `UTAB1` profile parameter description).
