

ML - Position of Message Line

This profile parameter specifies the line to be used for the display of applications which do not set the message line position explicitly by using the `SET CONTROL 'M'` statement. For information on the operand '`M`', see also Natural terminal command `%M` (Control of Message Line).

Within a Natural session, the profile parameter `ML` can be overridden by the session parameter `ML`.

Possible settings	B	Natural messages are displayed at the bottom of the screen.			
	T	Natural messages are displayed at the top of the screen.			
Default setting	T				
Dynamic specification	yes				
Specification within session	yes	Applicable Statements:	<code>SET CONTROL 'M'</code>		
		Applicable Command:			
Application Programming Interface	USR1005N	See <i>SYSEXT - Natural Application Programming Interfaces</i> in the <i>Utilities</i> documentation.
