

PC - Control of Personal-Computer Access Method

This Natural profile parameter only applies if Natural Connection is installed.

It determines whether support of the personal-computer access method is to be provided using Natural Connection.

Possible settings	ON	Personal-computer support is enabled. The Natural statements READ PC FILE or WRITE PC FILE can be used (for uploading or downloading); see UPLOAD PC FILE and DOWNLOAD PC FILE. With PC=ON, the system variable *DEVICE will always contain the value PC.
	OFF	No personal-computer support is to be provided.
	NAM	Field names are sent when data are uploaded/downloaded. This value is for mainframe environments only.
	NONAM	No field names are sent when data are uploaded/downloaded. This value is for mainframe environments only.
Default setting	(OFF , NAM)	
Dynamic specification	yes	
Specification within session	yes	The terminal commands %+ and %- can be used to control the PC support.

Multiple values are specified in a value list:

Example:

```
PC= ( ON , NONAM )
```

See the Natural Connection documentation for further information.

The files used for the PC access method have to be defined with the macros NTPRINT and NETWORK or the profile parameters PRINT, WORK and HCAM.

Note:

In asynchronous Natural sessions under the TP monitors Com-plete, CICS and UTM, the setting of this parameter is forced to OFF to avoid problems when changing over to NEXT mode.
