

# PLUGIN - Enable the Natural Plug-In Components

This Natural profile parameter is used to enable new or additional Natural components without having to link new components to your Natural nucleus or to apply specific fixes.

<b>Possible settings</b>	OFF	Deactivates all plug-in components, see note below.
<b>Default setting</b>	OFF	
<b>Dynamic specification</b>	yes	
<b>Specification within session</b>	no	

**Note:**

Because all components of Natural Version 3.1 that could be enabled using the profile parameter `PLUGIN` are an integral part as of Natural Version 4.1, the only possible setting of this parameter is `OFF`.
