

# PS - Page Size for Natural Reports

This Natural profile and session parameter specifies the maximum number of lines per page to be used for Natural reports created with the `DISPLAY` or `WRITE` statement. When used as a profile parameter, the `PS` parameter is honored in batch mode only and defines the physical page size. In online mode, the physical page size is always set to the physical screen height.

<b>Possible settings</b>	1 - 250	Maximum number of lines per page.	
	0	<p>The physical page size is to be used.</p> <p>If <code>PS=0</code> is specified for the first report to be output (Report 0), the physical-device page-size minus 1 will be used.</p> <p>If <code>PS=0</code> is specified for Reports 1 - 31, this will cause automatic new-page processing to be inhibited, that is, no automatic page-break processing will be performed.</p>	
<b>Default setting</b>	0		
<b>Dynamic specification</b>	yes		
<b>Specification within session</b>	yes	Applicable Statements:	DISPLAY FORMAT INPUT SET GLOBALS WRITE
		Applicable Command:	GLOBALS
<b>Application Programming Interface</b>	USR1005N	See <i>SYSEXT - Natural Application Programming Interfaces</i> in the <i>Utilities</i> documentation.	

See also *Page Size - PS Parameter* in the *Programming Guide*.

**Under Natural Security:** The setting of this parameter can be overridden by the Session Parameters option of the Library Profile.
