# BUS

BUS

This command is used to invoke the function Buffer Usage Statistics of the SYSTP utility. It provides information on the buffers allocated for the current Natural session, their sizes, and the actual buffer space being used.

Note:
The BUS command performs the same function as the SYSBUS command which is no longer available.

For further information, see *Buffer Usage Statistics* in the *Utilities* documentation.

Application Programming Interface: USR1019N. See *SYSEXT - Natural Application Programming Interfaces* in the *Utilities* documentation.
