

SYSDDM

A rectangular box with a thin black border containing the text "SYSDDM" in a bold, sans-serif font.

This command is used to invoke the *SYSDDM* utility which offers functions that are needed to create and maintain Natural data definition modules (DDMs).

For further information, see *SYSDDM Utility* in the *Editors* documentation.

Note Concerning Natural Single Point of Development:

This command is not available via Natural Studio's command line in a remote development environment, because DDMs are listed in the tree view under the node DDM and all functions of the *SYSDDM* utility are available via the context menu or the menu bar.
