AUTO-ADJUST

Indicates whether the coordinates specified on dialog element creation are to be scaled in the case of scalable dialogs (i.e., dialogs created with a non-zero DPI attribute). This is useful for dynamically creating controls in scalable dialogs whose size and/or position is based on an existing dialog element.

Applies to	Dialog (all types).
Data Type	BOOLEAN
Default Value	TRUE for scalable dialogs; FALSE otherwise.
Possible Values	TRUE / FALSE
