

# DPI

Specifies the number of dots (pixels) per logical inch in effect at the time the dialog was last saved from within the editor. This attribute, if non-zero, also indicates that the dialog is scalable.

**Note:**

The value of this attribute varies depending on whether small or large fonts (or a custom font size setting) are being used.

<b>Applies to</b>	Dialog (all types), date/time picker control, list view control, progress bar control, slider control, spin control, tree view control.
<b>Data Type</b>	I4
<b>Default Value</b>	0
<b>Possible Values</b>	0 - 200
