

# HEADER-FONT-HANDLE

Serves as a handle to assign a certain combination of font face, font size, and font style to the first column and the header line of a table control. Assigning an existing font handle value to this attribute leads to the header being displayed in this font.

<b>Applies to</b>	Table control.
<b>Data Type</b>	HANDLE
<b>Default Value</b>	System font
<b>Possible Values</b>	System font / any other defined fonts
