

HOURGLASS-UNSTACK Action

This chapter covers the following topics:

- Description
- Parameters

Description

Restores the previous pointer shape (hourglass or arrow) by decreasing the stack of pointers by one and by setting the pointer to the new stack top. If the stack is empty, the arrow shape is activated. This action corresponds to action HOURGLASS-STACK.

Parameters

Name/Data Type	Explanation
Level (I4)	Output The current pointer stack level.

Note:

The Level parameter is optional.

Example:

```
PROCESS GUI ACTION HOURGLASS-UNSTACK WITH #LEVEL GIVING #RESPONSE
```
