Description

Sets tabulator stops in a List Box Control even if the font in the List Box Control is proportional. The tabulator stops apply to the STRING attribute in any item of the List Box Control.

Parameters

Name/Data Type	Explanation
HANDLE OF LISTBOX	Input Handle of the List Box Control.
Tabstop (I4)	Input The tabstop is measured in units of one quarter of the system font's average width. You can enter this parameter any number of times (in ascending order). In the list box items' STRING, you determine the place of the tabstop by inserting the HORIZONTAL-TAB character (defined in the local data area NGULKEY1). Inserting this character will move the following STRING text to the next tabstop.
Response (I4)	Output Natural error (if applicable).
