STATUS-TEXT

By modifying the value of this attribute, you display the assigned text in the status bar of a dialog. The text will only be displayed if HAS-STATUS-BAR is TRUE. Then the DIL-TEXT will overlap the STATUS-TEXT value or vice versa, depending on which was modified last. For MDI child windows, the status bar is located in the MDI frame window.

Applies to	Dialog (window, MDI frame, MDI child).
Data Type	A253
Default Value	Empty string
Possible Values	Empty string / any text string
