About this Documentation

This documentation describes the installation of Natural on a Windows platform. The following topics are covered:

●	Before You Start	General information and prerequisites.
●	Installing Natural or Natural Runtime on a PC	How to install, maintain and update Natural or Natural Runtime on a PC. How to record an installation process in order to replay it on other PCs (silent installation).
●	Installing Natural or Natural Runtime on a File Server	How to install Natural and Natural Runtime on a file server and prepare the client PCs to access the file server installation. How to remove and update your file server or client environment.
●	Installing Natural Security	How to install Natural Security and prepare a first-time installation by defining administrators and system libraries.

See also *Natural Installer* and *INPL Utility* in the *Tools and Utilities* documentation.
