

# Known Issues

This chapter provides additional information that you should be aware of after having installed Natural.

---

## Terminal Command %=

If the background color of a window is changed with the terminal command %=, this will now also change the background color of the text constants. In earlier versions, the background color of text constants was not changed which caused an uncommon color layout.

## Installation of Predict with Natural

It is not possible to install Predict Version 4.4.1 or 4.5.1 with Natural Version 6.3 by executing the file *setup.exe* from the Predict CD. It is recommended that you start the Natural Installer (SYSINST) to install Predict.
