Natural Remote Procedure Call (RPC)

Natural Remote Procedure Call (RPC) is available as a separate subcomponent of Natural. It has its own version number. This measure takes into account that Natural RPC is a cross-platform component and makes it possible to provide new Natural RPC versions independent of new Natural versions for the various platforms supported.

As of Version 6.2 of Natural Remote Procedure Call (RPC), the enhancements listed in this chapter are available. The following topics are covered:

- New Application Programming Interface

- SYSRPC Utility Enhancements

New Application Programming Interface

The new application programming interface `USR2075N` enables you to terminate the EntireX Broker Service from within your application. See *Terminating an EntireX Broker Service* in the *Natural Remote Procedure Call (RPC)* documentation.

SYSRPC Utility Enhancements

It is now possible to terminate all server tasks associated with a given EntireX Broker service. See *Terminating a Server* in the *SYSRPC* part of the *Utility* documentation. In previous versions, it was only possible to terminate a single server.
