

Using the XML Toolkit

The following topics are covered:

- Invoking the Application
 - Getting Help
-

Invoking the Application

The XML toolkit is included in the library SYSXTK.

To use the XML Toolkit

- Select the library SYSXTK from the library workspace.

In the Dialogs folder choose dialog Menu.

Or:

In the Natural command line, enter LOGON SYSXTK.

Enter Menu.

The first screen of the dialog wizard is displayed.

The following functions are available:

- Generate from Natural Data Structure Uses the Natural Data Area as a data source.
- Generate from Document Type Definition/XML Schema Uses the Document Type Definition (.dtd), XML Schema (.xsd) or Tamino Schema 2 (.tsd) as a data source.
- Set up Specific Generation Options

Getting Help

To get help with the XML Toolkit

1. In the XML Toolkit main dialog choose XML Toolkit Help from the Help menu.

Or:

Press F1 in the XML Toolkit main dialog.
