Natural System Error Messages 6101-6150

NAT6101: No name for UNIX shell defined, shell cannot be started.

Text	No name for UNIX shell definded, shell cannot be started.
Expl.	Shell name must be defined before shell can be started.
Actn.	Define shell name; name must be entered in natparm (NATENV).

NAT6102: External editor specified in NATPARM.SAG could not be started.

Text	External editor specified in NATPARM.SAG could not be started.
Expl.	You tried to call an external editor as program editor. The string defined in your parameter module is not a valid program name.
Actn.	Define editor name which can be found in your PATH.

NAT6103: Registration of a clipboard format failed.

Text	Registration of a clipboard format failed.
Expl.	A clipboard format could not be registered.
Actn.	Retry the action with less programs running. If error occurs again contact Software AG Support.

NAT6104: Posting a message failed.

Text	Posting a message failed.
Expl.	A message could not be posted.
Actn.	Retry the action with less programs running. If error occurs again contact Software AG Support.

NAT6105: Registration of a window class failed.

Text	Registration of a window class failed.
Expl.	A window class could not be registered.
Actn.	Retry the action with less programs running. If error occurs again contact Software AG Support.

NAT6106: Creation of a window failed.

Text	Creation of a window failed.
Expl.	A window could not be created.
Actn.	Retry the action with less programs running. If error occurs again contact Software AG Support.

NAT6107: Command cannot be processed while debug mode is active.

Text	Command cannot be processed while debug mode is active.
Expl.	A Natural program or dialog is currently being executed in debug mode. In this situation, the entered command cannot be processed.
Actn.	Stop debug mode, and then enter the command again.

NAT6110: Installation has no message text for the error with this number.

Text	Installation has no message text for the error with this number.
Expl.	Either the current version of the Natural message texts is not available at your installation, or the texts have been edited.
Actn.	Load the current version of the message texts.

NAT6111: Natural cannot assign a table type to your program.

Text	Natural cannot assign a table type to your program.
Expl.	Internal error.
Actn.	Contact Software AG support.

NAT6112: This library is empty.

Text	This library is empty.
Expl.	You have logged on to a library which has no members.
Actn.	No action is required.

NAT6113: Please enter source name.

Text	Please enter source name.
Expl.	It is necessary to supply the object name in the edit command if you do not use the Software AG Editor.
Actn.	Please retype the command, specifying the name of the object you wish to edit.

NAT6120: The object is too big to read or edit in the Natural source area.

Text	The object is too big to read or edit in the Natural source area.
Expl.	An object must fit into the Natural source area before it can be read or edited.
Actn.	Either clear the Natural source area, or use the NATPARM program to increase the size of the source area.

NAT6121: Maximum source line number limit exceeded.

Text	The generated object contains too many source code lines.
Expl.	Natural source objects may only contain up to 9999 lines. The number of source lines needed to represent the current object exceeds this limit.
Actn.	Reduce the complexity of the object and retry the operation.

NAT6130: Invalid version of generated program (object code).

Text	Invalid version of generated program (object code).
Expl.	The generated Natural program cannot be executed with the current execution environment. Please check the following conditions: - The version of a generated program must not be higher than the version of the execution environment. - Generated programs, which are catalogued with Natural version 4.1.1, and which contain SQL statements, may not be executed with Natural version 4.1.2 or higher
Actn.	Recatalog the objects before running the application.

NAT6131: Error accessing temporary print file.

Text	Error accessing temporary print file.
Expl.	Natural is not able to generate a temporary print file in the directory which is specified by the <TMP̲PATH> entry in Natural.INI
Actn.	Check the path specified in Natural.INI

NAT6132: Detected end of file while reading from standard input.

Text	Detected end of file while reading from standard input.
Expl.	Natural detected an error condition while reading from the standard input terminal.
Actn.	Check that standard input stream for Natural delivers all neccessary characters.

NAT6133: Program :1: is non-portable and cannot be imported.

Text	Program ... is non-portable and cannot be imported.
Expl.	The target platform for import was unable to process the format of the generated program. The generated program was created using a Natural version which does not support the generation of portable code; in addition, it may be that the program was created in an environment whose endian mode is incompatible with that of the target environment.
Actn.	Recatalog the program with a Natural version which does support portable code.

NAT6134: Path length exceeds 255 characters.

Text	Path length exceeds 255 characters.
Expl.	A Natural object could not be imported/copied/moved/renamed. The operation was rejected because the resulting path name of the file in the target environment exceeded 255 characters.
Actn.	Retry the operation using shorter names.

NAT6139: The parameter CO=ON is not supported.

Text	The parameter CO=ON is not supported.
Expl.	The parameter CO is turned on. This implemention of Natural does not support this feature.
Actn.	Please set CO to OFF.

NAT6140: Dialog is already active.

Text	Dialog is already active.
Expl.	The current call to the dialog with given dialog ID cannot be executed because this dialog is already active.
Actn.	Check your calling structure to prevent invoking of an active dialog.

NAT6141: Dialog is not defined.

Text	Dialog is not defined.
Expl.	The call to the dialog cannot be executed because a dialog with this ID is not defined.
Actn.	Check the dialog ID you specified in the call.

NAT6142: Structure of FILEDIR.SAG is invalid.

Text	Structure of FILEDIR.SAG is invalid.
Expl.	The structure of FILEDIR.SAG belongs to an earlier version of Natural and is not understood by this version.
Actn.	Use the FTOUCH utility with the convert option to convert FILEDIR.SAG to the new format.

NAT6143: SyncSort error: status :1:, errno :2: occurred.

Text	SyncSort error: status ..., errno ... occurred.
Expl.	SyncSort was called for the Natural SORT statement and terminated with error codes. See your SyncSort documentatioin for the appropriate messages: - status is the return code of the function syncsort() and - errno is the standard "error number" variable"s value.
Actn.	See your SyncSort documentation for the appropriate action.

NAT6144: Repository error: failed to back out transaction.

Text	Repository error: failed to back out transaction.
Expl.	The Natural repository was called by the Natural/C system file driver to back out a transaction and returned an error code.
Actn.	Check your environment.

NAT6145: Repository error: transaction not completed successfully.

Text	Repository error: transaction not completed successfully.
Expl.	The repository was called by the Natural system file driver to end a transaction and returned an error code.
Actn.	Check your environment.

NAT6146: Repository error: failed to start transaction.

Text	Repository error: failed to start transaction.
Expl.	The Natural repository was called by the Natural/C system file driver to start a transaction and returned an error code.
Actn.	Check your environment.

NAT6147: Repository error: failed to delete object.

Text	Repository error: failed to delete object.
Expl.	The Natural repository was called by the Natural/C system file driver to delete an object and returned an error code.
Actn.	Check your environment.

NAT6148: Repository error: failed to copy / move object.

Text	Repository error: failed to copy or move object.
Expl.	The Natural repository was called by the Natural/C system file driver to copy or to move an object and returned an error code.
Actn.	Check your environment.

NAT6149: Locking conflict: failed to lock object.

Text	Locking conflict: failed to lock object.
Expl.	The Natural system file driver was called to lock an object, but the object to be locked was already locked by another user.
Actn.	Ask the other user to unlock the object.

NAT6150: Locking conflict: object is not locked.

Text	Locking conflict: object is not locked.
Expl.	Either your networking software has an error or Natural attempted to release an object which it expected to be locked.
Actn.	Check your environment.
