

# DFTITLE - Output Format of Date in Standard Report Title

This Natural profile and session parameter determines the output format of the date in the default title line of a report page (as output with a DISPLAY, WRITE or PRINT statement).

Within a Natural session, the profile parameter DFTITLE can be overridden by the session parameter DFTITLE.

<b>Possible settings</b>	S	The date is output with a 2-digit year component and delimiters. For example: <i>yy-mm-dd</i> .	
	L	The date is output with a 4-digit year component and delimiters. For example: <i>yyyy-mm-dd</i> .	
	I	The date is output with a 4-digit year component and no delimiters. For example: <i>yyyymmdd</i> .	
<b>Default setting</b>	S		
<b>Dynamic specification</b>	yes		
<b>Specification within session</b>	yes	Applicable Statements:	SET GLOBALS
		Applicable Command:	GLOBALS
<b>Application Programming Interface</b>	USR1005N	See <i>SYSEXT - Natural Application Programming Interfaces</i> in the <i>Utilities</i> documentation.	

## Notes:

1. DFTITLE is evaluated at runtime and determines whether the date is displayed with a 2-digit or 4-digit year component with or without delimiters. It has no effect on a user-defined page title (as specified with a WRITE TITLE statement).
2. The sequence of the day, month and year components and the delimiter characters used are determined by the profile parameter DTFORM.
