GFID - Global Format IDs

This Natural profile and session parameter is used to control Natural's internal generation of global format IDs so as to influence Adabas's performance concerning the re-usability of format buffer translations.

Possible settings	ON	Global format IDs are generated for all views.	
	OFF	Global format IDs are not generated.	
	VID	Global format IDs are generated only for views in local/global data areas, but not for views defined within programs.	
Default setting	ON		
Dynamic specification	yes		
Specification within session	yes	Applicable Statements:	OPTIONS
		Applicable Commands:	GFID option of COMPOPT.

For details on global format IDs, see the Adabas documentation.
