

# RDACTIVE - Activate Remote Debugger

This Natural profile parameter specifies whether a remote debugger on a Windows computer is to be used or not. RDACTIVE is only relevant if the system command DEBUG has been used. It is used in combination with the profile parameters RDNODE (where the relevant node name is specified) and RDPORNT (where the port number is specified).

<b>Possible settings</b>	ON	Remote debugging is enabled.  For DCOM (Windows only) or RPC servers, the remote debugging session is opened automatically.
	OFF	No debugging is possible.
<b>Default setting</b>	OFF	
<b>Dynamic specification</b>	yes	
<b>Specification within session</b>	no
