

SYMGEN - Generate Symbol Table

This Natural profile and session parameter specifies whether a symbol table is to be generated or not.

The symbol table contains all symbols used within a Natural program (for example, variable names). It is part of the generated program and is required, for example, for the Natural Debugger and the dialog editor.

Within a session, the profile parameter SYMGEN can be overridden by the session parameter SYMGEN.

Possible settings	ON	A symbol table will be generated.	
	OFF	No symbol table will be generated.	
Default setting	OFF		
Dynamic specification	yes		
Specification within session	yes	Applicable Statements:	none
