## **About this Documentation**

This documentation describes how Natural supports Unicode and code pages on Windows, UNIX and OpenVMS platforms. It also describes how Natural supports bidirectional languages and double-byte characters.

This documentation is organized under the following headings:

| ٢ | Introduction   | General information on code pages and the Unicode Standard,<br>and on how Unicode and code pages are supported in Natural.   |
|---|--|--|
| ٩ | Unicode and Code Page<br>Support in the Natural<br>Programming Language        | Information on the U format and on statements, logical<br>condition criteria, system variables, large and dynamic<br>variables, and session parameters which provide Unicode and<br>code page support. |
| ٢ | Configuration and<br>Administration of the<br>Unicode/Code Page<br>Environment | Information on the ICU library, on profile parameters which<br>provide Unicode and code page support, and on the encoding<br>of code page data.  |
| ٢ | Development Environment  | How to customize your environment and how Unicode is handled by the Natural editors.   |
| ٢ | Unicode Input/Output<br>Handling in Natural<br>Applications                    | How to display and enter Unicode data. Information on the Natural Web I/O Interface client which is used in SPoD and runtime environments.   |
| ٢ | Unicode Data Storage   | Information on database access, and on the work file types and print files which provide Unicode and code page support.  |
| ٢ | Platform Differences   | Handling differences on Windows, UNIX and OpenVMS platforms.   |
| ٢ | Migrating Existing<br>Applications   | About the impact of Unicode on existing applications. How to migrate existing objects, add Unicode support to existing applications, and how to migrate Natural remote procedure calls (RPC).          |
| ٢ | Special Considerations and<br>Limitations                                      | Important information and restrictions.  |
| ٢ | Bidirectional Language<br>Support  | How Natural supports bidirectional languages.  |
| ٢ | Double-Byte Character<br>Support   | How Natural supports double-byte characters.   |
| ٢ | Frequently Asked Questions   | Answers to frequently asked questions.   |
