

# Object Specification - All Objects on the Work File

**Only applies to the load or scan function.**

The option **Load/Scan All Objects on the Work File** is used to select all objects available in the work file for processing. In advanced-user mode, from the **Load/Scan All Objects** screen, you can invoke the **Settings** screen where you can specify option and parameter settings. See the section *Settings*. For descriptions of keywords and valid values, see *select-clause* in the section *Direct Commands*.
