

List non-Natural File - Resource

Subprogram Name	Executable Example	Viewable Example
NAT-RES	NAT-RES?source=e3xslt2.xml&lib=sysweb NAT-RES?source=composing_natural_logo.jpg&lib=sysweb3 NAT-RES/sysweb3/e3put.html	NAT-RES

Restriction

Only available on platforms with shared resources.

Description

Generates an HTML page with the listing of a Natural source object. Depending on the definition at the text member MIMEDATA the data will be transferred as binary or as alphanumeric data.

Parameters

LIB=	Natural LIBRARY
SOURCE=	Resource name with extension

How To Invoke

```
nat-res?source=e3xslt2.xml&lib=sysweb3
```

How To Invoke with extended URL syntax

Instead of specifying the parameters LIB= and SOURCE=, library and source name can be added directly after the program name. `nat-res/<yourlibrary>/<yourresource>`

Extended Functionality

If the HTTP server is PUT enabled, NAT-RES can be used to write back to the HTTP server with an HTTP put request.

To activate the PUT capability, modify the subprogram NAT-RES by setting the variable F_PUT to TRUE and recatalog the subprogram NAT-RES.
