

# Setting up Specific Generation Options

The generation options are arranged on on two screens and are grouped into data fields and path definition.

The following topics are covered below:

- Invoking the Generation Options Setup Screens
- First Screen
- Second Screen
- Saving Your Options Permanently

## Invoking the Generation Options Setup Screens

 **To invoke the first screen of the generation options function**

- On the Main Menu screen, press PF10 **Optio(n)**.

The first screen of the Options setup function is displayed. The map fields are described below.

## First Screen

Special characters that are not valid in XML have to be converted into valid names. The following map enables you to change the default conversion settings, if required.

```

09:51:35                *** NATURAL XML Toolkit ***                2007-01-17
User DEFAULT                - Options -                            Library SYSXTK

Additional fields
Counter separator character ..... @

XML name replacements
Namespace separator character ':' with .. $
Dot sign '.' with ..... /

Natural variable name replacements
Plus sign '+' with ..... plus_____

11:04:10          *** NATURAL XML Toolkit ***          2007-01-17
User DEFAULT          - Options -          Library SYSXTK

External file:
/nat_64/proj/natc/63/samples/sysxtk/empl.dtd_____

Natural library:
SYSXTK_

Enter-PF1---PF2---PF3---PF4---PF5---PF6---PF7---PF8---PF9---PF10--PF11--PF12---
      Help           Exit           Prev           Canc

```

## Field Descriptions

External file

<b>Format/Length:</b>	A253
<b>Default Value:</b>	(Resource directory of current library)

Natural library

<b>Format/Length:</b>	A8
<b>Default Value:</b>	(current library)

## Saving Your Options Permanently

All settings made in the Options menu are written to the text member XML-INI.

Whenever a new Natural patch level or service pack is installed, all settings made in the Options menu are overwritten.

In order to keep your settings permanently, you are recommended to save the text member XML-INI to the FUSER before you install a patch level or service pack.
