MAINPR - Override Default Output Report Number

This Natural profile parameter is used to override the default output report number for all Natural reports. It must be set to a valid printer number (0 - 31).

Possible settings	`0 - 31`	Valid printer number.
Default setting	`0`	
Dynamic specification	yes	
Specification within session	no	
Application Programming Interface	`USR6002N`	See *SYSEXT - Natural Application Programming Interfaces* in the *Utilities* documentation.

Specifying a `MAINPR` setting is the same as changing all of the `DISPLAY`, `PRINT`, `WRITE` or `INPUT` statements' printer references from the default setting (`0`) to the desired printer number.

A physical printer corresponding to the report number specified must be defined to Natural as described in the *Configuration Utility* documentation, section *Device/Report Assignments*.
