

TRYALT - Try Alternative Server Address

This Natural profile parameter determines whether an RPC client should try to execute an RPC request on an alternative server (ON) or not (OFF). For further information, see *Specifying RPC Server Adresses* in the *Natural Remote Procedure Call (RPC)* documentation.

TRYALT is specified on the client side only.

Possible settings	ON	If a request could not be executed on the node you specified, the RPC client tries to find an alternative server address to send that request to.
	OFF	No such attempt will be made.
Default setting	OFF	
Dynamic specification	yes	
Specification within session	yes	At runtime, this value can be overwritten using the Parameter Maintenance function of the SYSRPC utility.

For further information, see the *Natural Remote Procedure Call (RPC)* documentation.
