

NEWPAGE

<pre> NEWPAGE [(rep)] [{ { EVEN [IF] TOP [OF] [PAGE] { { IF } } LESS [THAN] operand1 [LINES] [LEFT] { { WHEN } } } }] [[WITH] TITLE title-definition] </pre>
--

This chapter covers the following topics:

- Function
- Syntax Description
- Example

For an explanation of the symbols used in the syntax diagram, see *Syntax Symbols*.

Related Statements: AT END OF PAGE | AT TOP OF PAGE | CLOSE PRINTER | DEFINE PRINTER | DISPLAY | EJECT | FORMAT | PRINT | SKIP | SUSPEND IDENTICAL SUPPRESS | WRITE | WRITE TITLE | WRITE TRAILER

Belongs to Function Group: *Creation of Output Reports*

Function

The NEWPAGE statement is used to cause an advance to a new page. NEWPAGE also causes any AT END OF PAGE and WRITE TRAILER statements to be executed. A default title containing the date, time of day, and page number will appear on each new page unless a WRITE TITLE, WRITE NOTITLE, or DISPLAY NOTITLE statement is specified to define specific title processing.

Notes:

1. The advance to a new page is not performed at the time when the NEWPAGE statement is executed. It is performed only when a subsequent statement which produces output is executed.
2. If the NEWPAGE statement is not used, page advance is controlled automatically based on the Natural profile/session parameter PS (Page Size for Natural Reports).

Syntax Description

Operand Definition Table:

Operand	Possible Structure		Possible Formats												Referencing Permitted	Dynamic Definition		
operand1	C	S															yes	no

Syntax Element Description:

Syntax Element	Description
<i>(rep)</i>	<p>Report Specification:</p> <p>The notation (<i>rep</i>) may be used to specify the identification of the report for which the NEWPAGE statement is applicable.</p> <p>A value in the range 0 - 31 or a logical name which has been assigned using the DEFINE PRINTER statement may be specified.</p> <p>If (<i>rep</i>) is not specified, the NEWPAGE statement will be applicable to the first report (Report 0).</p> <p>For information on how to control the format of an output report created with Natural, see <i>Controlling Data Output</i> (in the <i>Programming Guide</i>).</p>
EVEN IF TOP OF PAGE	<p>EVEN IF TOP OF PAGE Option:</p> <p>This option is used to cause a new page (with corresponding AT TOP OF PAGE and page title processing) to be generated, even if a new page was initiated immediately before the NEWPAGE statement was encountered.</p>
WHEN LESS THAN <i>operand1</i> LINES LEFT	<p>WHEN LESS THAN ... LINES LEFT Option:</p> <p>This option is used to cause a new page to be generated when there are less than <i>operand1</i> lines left on the current page (current line count compared with value for the Natural profile/session parameter PS).</p>
WITH TITLE <i>title-definition</i>	<p>WITH TITLE Option:</p> <p>This option can be used to specify a title which is to be written to the new page generated.</p> <p>The <i>title-definition</i> is specified using the same syntax as described for the WRITE TITLE statement, except that the SKIP clause is not allowed in a NEWPAGE WITH TITLE <i>title-definition</i> statement.</p>
