SYSPROD

```
SYSPROD
```

This command is used to ascertain which products are installed at your Natural site. You are given information on your current Natural version, Natural selectable units and products running with or under Natural.

When you enter the command, a dialog displays information such as the following for each product installed:

- the product name,

- the product version (see also *Version* in the *Glossary*),

- the installation date and time.

For some of the products listed, you can get additional information by marking them with a line command in the **Cmd** column of the dialog.

Line Command	Description
EX	Display extended product information.
HI	Display history of product information.
SC	Display subcomponents of product.

Note:
For some products, no line commands are allowed.
