SYSEXV Utility SYSEXV Utility

SYSEXV Utility

The utility SYSEXV provides example programs to illustrate new features of current Natural versions. All programs are available as source objects and display a detailed functionality description when they are executed. Example programs for non-current Natural versions are also available.

This chapter covers the following topics:

- Executing Example Programs of Current Versions
- Executing Example Programs of Non-current Versions
- Terminating the SYSEXV Utility

1. Enter the following system command:

Executing Example Programs of Current Versions

To execute an example program of a current version

SYSEXV	
Or: Log on to the SYSEXV library:	
LOGON SYSEXV	
and continue by entering	
VERSION	

As a result, a menu is displayed from which you can choose a Natural version.

2. Choose a version from the menu.

As a result, a commented menu is displayed from which you can choose an example program relevant to the selected version.

3. Choose a program.

As a result, the program is executed.

Executing Example Programs of Non-current Versions

To execute an example program of a non-current version

1. Log on to the SYSEXV library:

LOGON SYSEXV

2. List the text object A-README.

Note:

Do not modify the text object A-README.

A-README lists and comments example programs for non-current versions.

3. Choose a program and execute it.

Terminating the SYSEXV Utility

- To terminate the SYSEXV utility
 - In the SYSEXV utility menu, choose **Exit**.

Or:

Press PF3 or PF12.
