

# Functions

This section describes the main functions provided by the Object Handler.

You can take advantage of the Object Handler wizards to guide you through the steps required to execute the unload, load and scan functions. The wizards are activated by default. If you prefer the unload, load or scan mode for the experienced user instead, in the **Main Menu**, mark the field next to **Advanced user**. You can also set advanced-user mode as the default by using the appropriate Object Handler profile option. See also the section *Profile Settings*.

You can create standard procedures to define recurring settings and object specifications which automate the processing of the unload, load or scan function. See the section *Workplans* for further information.

This section covers the following topics:

- Wizards
- Advanced User
- Restart Load
- View
- Find
- Administration
- Change the Workplan Library
- Select System File
- Select Library
- List and Select Workplan
- Select System Error Messages
- Select Objects

## Notes:

1. The topic *Change the Workplan Library* is described in the section *Administration*.
2. The topic *List and Select Workplan* is described in *List the Available Workplans in the Workplan Library* in the section *Administration*.
