Configuring the Client

The information in this part not only applies to the Natural Web I/O Interface client, it also applies to Natural for Ajax which is also a client of the Natural Web I/O Interface server.

This part explains how to configure the client so that it can be used in a Natural runtime environment. The following topics are covered:

a	About the Logon Page
a	Managing the Configuration File for the Session
a	Using the Configuration Tool (J2EE only)
a	Overview of Configuration File Elements
a	Starting a Natural Application with a URL
a	Using Style Sheets (J2EE only)
a	Using Themes (IIS only)
a	Configuring Security (J2EE only)
a	Wrapping a Natural for Ajax Application as a Servlet
a	Trust Files (J2EE only)
a	Logging (J2EE only)
