

# COLUMN

A COLUMN attribute value corresponds to exactly one ROW attribute value. The combination of these two denotes a cell inside a table control.

- To denote a cell of the table: COLUMN must be  $\geq 1$  and ROW must be  $\geq 1$ .
- To denote the first column in the table: COLUMN must be 0 and ROW must be 1.
- To denote the header row in the table: COLUMN must be 1 and ROW must be 0.

<b>Applies to</b>	Table control.
<b>Data Type</b>	I4
<b>Default Value</b>	1
<b>Possible Values</b>	0 - 9999
