

Image List Control

This chapter covers the following topics:

- Description
 - Attributes for Image List Control
 - Events
-

Description

An image list control is used for storing multiple images of the same size and color representation, allowing the images to be efficiently shared by multiple dialog elements (e.g., by multiple items in a list view or tree view control).

For more information on image list controls, please refer to the article [Working with Image List Controls](#).

Attributes for Image List Control

Attribute Name	Query	Set/Modify	In Attr. Window
