

# DOCKING

Specifies the sides of the owning dialog on which docking is allowed. In order for a dockable tool bar control to be able to dock, both the tool bar control and the owning dialog must allow docking on the specified side(s). The supported docking positions are: none (tool bar control may only be floated), top only, bottom only, left only, right only, horizontal (top or bottom), vertical (left or right) or any side.

<b>Applies to</b>	Dialog (window, MDI Frame), dialog bar control, tool bar control.
<b>Data Type</b>	I4
<b>Default Value</b>	DL-ANY
