

Client-Size Event

This chapter covers the following topics:

- Applies To
 - Description
-

Applies To

Dialog.

Description

Occurs whenever the interior size of the dialog window changes, for example, if a tool bar control is re-docked at a different location. The dialog interior is the part of the dialog which does not include the menu bar (if any), tool bars (if any) or status-bar (if any). You can use the client-size event handler to size controls in the dialog window relative to the dialog window's size.
