

Insert-Row Event

This chapter covers the following topics:

- Applies To
 - Description
-

Applies To

Table Control.

Description

Occurs after the end user has inserted a row by pressing `INS` or by calling "PROCESS GUI ACTION TABLE-INSERT-ROW...". The table control's `STYLE` attribute must have had the value "e" (extendable, allows end users to insert rows).

If this event occurs in a cell, the `ROW` and `COLUMN` attributes are modified so that they contain the position of the cell.
