

HAS-TOOLBAR

Determines whether the tool bar of a dialog (that is, the tool bar plus the tool bar items) is to be displayed or not. You use this attribute to dynamically switch the tool bar on and off.

Note:

The handle value of the tool bar must be assigned to the TOOLBAR-HANDLE attribute.

Applies to	Dialog (window, MDI frame, MDI child).
Data Type	BOOLEAN
Default Value	FALSE
Possible Values	TRUE / FALSE
