

Timer Attributes Window

▶ Accessible Using

1. "Dialog > Timers"; or
 2. CTRL+ALT+I.
-

Entries

Note:

For context-sensitive help on attribute entries, select the entry so it has the focus, and press F1.

Entry in Attributes Window	Represents
Timer:	Displays the handle names and the TIMER-INTERVAL attribute values of the timers already created. (You may create up to 16 timers per dialog).
Selected Timer:	In this group frame, you assign attribute values to the timer selected in the "Timers" list box on the left.
Name	Handle name of the timer (may be overwritten with another name starting with the # sign).
Interval	TIMER-INTERVAL attribute value.
Events	Dialog box for editing event handlers.
New	Creates a new timer.
Cut	Cuts the selected timer and copies it to the clipboard. (You can cut and paste one or several timers).
Paste	Pastes timer(s) from the clipboard. Note: The "New" and "Paste" entries insert timers behind the currently selected timer, or, if none is selected, at the top of the list. You deselect timers by holding down CTRL while selecting the selected timers.
OK	Save settings and exit the window.
Cancel	Exit the window without saving the settings.
Help	Provides online help on the attributes window.
