

Natural System Error Messages 1901-1950

NAT1901: Couldn't bind to a connection point (SOCKET code :1:).

| | |
|-------|--|
| Text | Couldn't bind to a connection point (SOCKET code :1:). |
| Expl. | The socket function "bind" failed to execute because <ul style="list-style-type: none"> - The network subsystem has failed - Not enough buffers available, too many connections |
| Actn. | check your system for <ul style="list-style-type: none"> - correctly installed network system - enough buffer space |

NAT1902: Socket error :1: : Couldn't resolve service port.

| | |
|-------|------|
| Text | TODO |
| Expl. | TODO |
| Actn. | TODO |

NAT1903: Couldn't connect to remote debugging service (SOCKET code :1:).

| | |
|-------|--|
| Text | Couldn't connect to remote debugging service (SOCKET code :1:). |
| Expl. | Natural cannot create a connection to the remote debugging service because of one of the following reasons: <ul style="list-style-type: none"> - the specified remote debugging node is not accessible - the remote debugging service is not active - the used port id does not match the port of the remote debugging service - the remote debugging service did not initialise correctly Check that <ul style="list-style-type: none"> - the NT machine where the remote debugging service is running is accessible (e.g. via the "ping" command) - the remote debugging service is installed and running - the port used to install the service (default=2500) matches the port number specified in the RDPORT parameter |
| Actn. | matches the port number specified in the RDPORT parameter - the remote debugging service initialised correctly (take a look at NT's event viewer for any remote debugging service related error entry) |

NAT1904: The node name :1: could not be resolved (SOCKET code :2:).

| | |
|-------|---|
| Text | The node name :1: could not be resolved (SOCKET code :2:). |
| Expl. | the node name where the remote debugging service is supposed to run could not be resolved |
| Actn. | check that the specified node name is available in the network system |

NAT1905: Remote Debugging: Error while receiving data (SOCKET code :1:).

| | |
|-------|--|
| Text | Remote Debugging: Error while receiving data (SOCKET code :1:). |
| Expl. | The connection between Natural and the remote debugging service has been broken. |
| Actn. | Set up debugging session again. |

NAT1906: Remote debugging: Error while sending data (SOCKET code :1:).

| | |
|-------|--|
| Text | Remote debugging: Error while sending data (SOCKET code :1:). |
| Expl. | The connection between Natural and the remote debugging service has been broken. |
| Actn. | Set up debugging session again. |

NAT1907: Establishing a local debugging session failed.

| | |
|-------|---|
| Text | Establishing a local debugging session failed. |
| Expl. | This platform does not provide a Natural Debugger |
| Actn. | Use Natural"s remote debugging facility to debug the application. |
