

CP - Default Code Page Name

This Natural profile parameter defines the default code page for Natural data and Natural sources.

If no code page is specified for a code page sensitive operation such as data conversions to and from Unicode (for example, by means of a statement specific ENCODED option or by another profile parameter), the default code page applies.

For the current Natural session, it is assumed that all code page data, for example, Natural sources, contents of A-format fields, etc., are stored in this code page format.

See also *Profile Parameters* in the *Unicode and Code Page Support* documentation.

Possible settings	1 - 64 characters	The name of the desired code page.
	' ' (blank)	Reset to system code page.
Default setting	' ' (blank)	System code page.
Dynamic specification	yes	
Specification within session	no
