

ESXDB - Database ID Used for Entire System Server DDMs

This Natural profile parameter applies to the Entire System Server Interface.

It specifies the database ID used for Entire System Server's DDMs.

Possible settings	1 - 254	Database ID. To activate this parameter, a database ID in the range of 1 to 254 must be specified. Note: Entire System Server's DDMs are cataloged with DBID=148. If you are using an Adabas database with this DBID, specify a different number for ESXDB. For information on how to do this, please refer to <i>Setting up the Entire System Server Interface</i> in the <i>Operations</i> documentation.
	0	With ESXDB=0, the Entire System Server Interface is not active.
Default setting	0	
Dynamic specification	no	
Specification within session	no
