

FSEC - Natural Security System File

This Natural profile parameter only applies if Natural Security is used.

This parameter defines four subparameters for the Natural Security system file which is used by Natural Security to retrieve/store its security information.

For information on system files, refer to *System Files* in the *Operations* documentation.

Possible settings	<i>database-ID</i>	1-65535, except 255	Database ID 255 is reserved for logical system files for Software AG products, see profile parameter LFILE.
		0	DBID=0 sets FSEC inactive. This is mandatory for a non-security environment. If no FSEC system file is available, do not enter anything in the file number field.
	<i>file-number</i>	1-5000	File number for the Natural Security system file.
		0	FNR=0 sets FSEC inactive. This is mandatory for a non-security environment. If no FSEC system file is available, do not enter anything in the file number field.
	<i>password</i>	1 to 8 characters	The password is only required if the Natural Security system file has been password-protected using the Adabas security feature. The password is reserved for future use; currently, it is ignored.
	<i>cipher-key</i>	1 to 8 numeric digits	The cipher key is only required if the Natural Security system file has been ciphered using the Adabas security feature. The cipher key is reserved for future use; currently, it is ignored.
	RO		Read only option - not supported on this platform.
Default setting	none		
Dynamic specification	yes		
Specification within session	no		

The syntax of this parameter is:

FSEC=(*database-ID,file-number,password,cipher-key,RO*)

Examples:

FSEC=(10,8)

FSEC=10,5,PASSW1,12345678

FSEC=1,200,,12345678
