

# INIT-LIB - Library for Automatic Logon

This Natural profile parameter specifies the name of the library to be used for an automatic logon (see the profile parameter AUTO) when Natural is started.

<b>Possible settings</b>	1-8 characters	Valid library name.
<b>Default setting</b>	none	
<b>Dynamic specification</b>	no	
<b>Specification within session</b>	no	

If Natural Security is installed, INIT-LIB is not evaluated; the library to be used for automatic logon is read from the FSEC system file (see the *Natural Security* documentation for further information).
