

NC - Use of Natural System Commands

This Natural profile and session parameter controls whether Natural system commands can be used during the Natural session or not.

Within a Natural session, the profile parameter NC can be overridden by the session parameter NC.

Possible settings	ON	<p>System commands cannot be used - except FIN, LAST, LOGOFF, LOGON, RENUMBER, RETURN, SETUP and TECH.</p> <p>If you have Natural Security installed, any system command restrictions you set with Natural Security are valid, regardless of the setting of the NC profile parameter.</p> <p>In a Natural Development Server environment on mainframe computers, the value OFF will be assumed for the Natural Development Server, even if NC=ON has been specified.</p> <p>If NC=ON has been specified on the client side, subsequent system commands issued on the client side will be rejected as described above.</p>	
	OFF	All system commands can be used.	
Default setting	OFF		
Dynamic specification	yes		
Specification within session	yes	Applicable Statements:	
		Applicable Command:	GLOBALS
Application Programming Interface	USR1005N	See <i>SYSEXT - Natural Application Programming Interfaces</i> in the <i>Utilities</i> documentation.	

Note:

Natural terminal commands and user-created commands (object module names) are not affected by the NC parameter.
