RDPORT - Remote Debugger Port

This Natural profile parameter specifies the port number on which a remote debugger on a Windows computer has been installed.

Possible settings	`0 - 9999`	Port number. By default, the debugger service is installed on the Windows computer's Port 2600. You can therefore leave the UNIX computer's `RDPORT` setting at the default. If, however, Port 2600 on Windows has been reserved for another service, and a different port number has been specified, you must change `RDPORT` accordingly.
Default setting	`2600`	
Dynamic specification	yes	
Specification within session	no	

Note:

See the *Debugger* documentation for further details.
